PROFESSIONAL SUMMARY

Data and analytics engineer with 6+ years architecting enterprise BI, financial analytics, and GenAI automation for global organizations. Designs and ships LLM-augmented agents, PySpark pipelines, and 15M+ row Power BI models end to end. Impact: 1-2% global discount reduction, 32 analyst hours per week automated away, month-end close 70% faster.

CORE SKILLS

GenAI & AI Engineering: LLM Application Development, Autonomous Agent Design, Prompt Engineering, Multimodal LLM Pipelines, Zero-Shot Entity Extraction, LangChain / LangGraph, OpenAI & Claude APIs, Whisper Speech-to-Text

BI & Visualization: Power BI, Advanced DAX, Power Query (M), Multi-Level RLS, Semantic & Tabular Modeling, KPI Architecture, Report Performance Tuning, Tabular Editor, DAX Studio, D3.js

Data Engineering: PySpark, Advanced SQL, ETL / ELT Pipeline Design, Databricks, Delta Lake, DuckDB, Parquet / PyArrow, SAP HANA, Fact & Dimension Modeling, Azure Data Fundamentals

Python & Automation: Python (Pandas, NumPy), UiPath RPA, PyInstaller Standalone EXE, python-pptx, OpenPyXL / XlsxWriter, Selenium / Playwright, Win32 COM (Outlook, Excel), REST API Integration, SharePoint Integration, Webex REST API, Windows Task Scheduler

Domain Expertise: Financial Analytics, FP&A & Executive Reporting, Cost Allocation Modeling, Discount & Margin Analytics, Fund Accounting & Reconciliation, Forecast vs. Actuals

PROFESSIONAL EXPERIENCE

Cisco Systems — Data & Finance Analytics Specialist — Jan 2024 - Present | Bengaluru, India

- **Global Discount & Margin Dashboard:** 20M+ row, 4-source Power BI model with multi-level RLS across three theaters drove a 12% discount reduction in 3 months.
- **Embedded Local Analytics:** Reclaimed 16 hours per week by shipping two zero-dependency Windows executables with embedded DuckDB and Parquet, adopted independently by non-technical finance analysts.
- **Financial Forecasting Automation:** Engineered automated Python forecasting model applying complex business allocation factors, eliminating manual Excel workflows and saving 90+ hours per quarter.
- **GenAI & Hybrid Automation:** Cut month-end reporting time ~70% with autonomous LLM agents, a team-wide analytics prompt library, and hybrid Python, UiPath, and SQL automation frameworks.

Accenture — Data Engineering & BI Analyst — Dec 2019 - Dec 2023 | Bengaluru, India

- **PySpark ETL at Scale:** Built PySpark ETL from scratch to transform and map GB-to-TB enterprise datasets into analytics-ready schemas, serving 100+ business users across client engagements.
- **Dashboard Performance:** Cut Power BI load and refresh times 40-50% by auditing legacy reports, re-architecting data models, and optimizing Power Query transformation steps.
- **Delta Lake Modeling:** Modeled multi-source enterprise data into Databricks Delta Lake tables with partitioning strategies that kept downstream BI refreshes zero-touch and daily.

SELECTED PROJECTS

- **Shift Financial Audit & Reconciliation:** Desktop commercial audit engine reconciling multi-million row ledgers with PVMC variance bridges and DuckDB - 15M rows, zero variance.
- **CTO Business Review KPI Pipeline:** SAP HANA to a branded executive deck in one trigger, computing 12 KPIs - replaced 16 analyst hours per week.
- **BHOLA Autonomous Coding Agent:** Cyclic LangGraph multi-agent system with AST self-healing loops and ChromaDB RAG - 84% benchmark code generation pass rate.
- **LLM-Forge Fine-Tuning Studio:** Full-stack LLM fine-tuning studio with LoRA/QLoRA, real-time WebSocket loss telemetry, and side-by-side inference playground.
- **Research-Arena Evaluation Platform:** Cascading 4-stage autonomous research-to-code pipeline with Stanford STORM consensus debates and typed ledger architecture.
